Free to Air Systems have many benefits over other satellite systems.

Free to air systems allow you to get TV for free! There are over 3000 free-to-air TV and radio channels available world-wide, many of which are European language channels.

You can enjoy watching programmes from your home country with just a one off payment for the equipment needed.

At Clear Picture we offer a wide range of free to air satellite services, all carried out by our fully trained staff, from full system design and installation to maintenance and servicing. Our friendly staff will be happy to talk you through our installation process.

We also specialise with Pay-for-View European channels and motorised dishes.

Take a look at our table below to get an idea of what satellites and FREE to air channels are available:
